

DialMore Announces the Launch of DialMore.com and Availability of the CitaLink LiveCaller™ Personal Calling Assistant

DialMore's new Web site features the CitaLink LiveCaller™, an Internet-based on-demand personal calling assistant.

Las Vegas, NV ([PRWeb](#)) June 12, 2007 -- DialMore announces the launch of its Web site www.DialMore.com. DialMore, a company dedicated to helping direct marketers improve the efficiency and results of campaigns, will offer the CitaLink LiveCaller™ personal calling assistant from its new site.

“The CitaLink LiveCaller™ system allows direct marketers to better utilize their time, eliminating the time wasted on ringing phones, unanswered calls, wrong numbers and leaving messages,” says Gil Ortega, president of DialMore. “The result is a more efficient campaign.”

[CitaLink LiveCaller™](#) is an Internet-based on-demand application, meaning there is no hardware or software to buy or download. The system can be accessed from anywhere there is an Internet connection and a telephone.

Users import a lead or contact list in Excel, CVS or similar format into the CitaLink LiveCaller™. The system will then automatically call numbers on the list. If there is no answer, the system will leave a message prerecorded by the user. If the line is answered, the CitaLink LiveCaller™ instantly connects the user, enabling both ends to talk with out any skips or pauses in the connection. While the user talks to a prospect, the system will leave voicemails for the user, and will connect the user to live prospects when the original call is completed.

CitaLink LiveCaller™ also features a call display feature. This feature keeps track of calls and the results stemming from them. The user can then view and print these campaign results to get an idea of the effectiveness of the campaign.

Hourly CitaLink LiveCaller plans begin at \$11.50 per hour. More information can be found online at www.DialMore.com.

About DialMore

Dialmore's products are designed to be easy to use, so users don't have to invest valuable time learning "complicated" technology. DialMore was founded in 2007.
