

Baxa Launches Microsite Featuring the MedBoard Medication Tracking System

Baxa announces the launch of a microsite dedicated to its MedBoard Medication Tracking System featuring enhanced product information and interactive demonstration tools. Customers can use the site's interactive tools to explore MedBoard features and benefits, as well as download documents covering frequently asked questions and key product attributes.

Englewood, Colo. ([PRWeb](#)) May 2, 2008 -- Baxa Corporation announces the launch of a new microsite featuring its MedBoard Medication Tracking System (MTS). The site is designed to complement Baxa direct sales efforts and features an interactive product demonstration and animated workflow. Customers can use the site's interactive tools to explore MedBoard features and benefits, as well as download documents covering frequently asked questions and key product attributes.

"The microsite allows users to explore the solutions that the MedBoard MTS offers healthcare facilities," notes Pete Campanella, Baxa Director of Professional Services. "The goal of the site is to provide a one-stop shop for all MedBoard questions." Working with the site, users can interact with the software demo and gain a greater understanding of the product than is possible through brochures or handouts.

The first wireless tracking system for drug doses, MedBoard helps health systems improve productivity through order prioritization and delivery assurance, reducing time spent fielding nursing calls and tracking order status. With its dynamic order monitoring, MedBoard reduces waste by identifying time-sensitive orders and ensuring on-time delivery. Built-in reports allow pharmacy managers to demonstrate performance by delivery times, order type, nursing unit and more. For more information on MedBoard, or to experience the new microsite features, visit <http://www.baxa.com/medboard>.

About Baxa Corporation:
