

First World of Warcraft Millionaire Uncovers Advanced Gold Making Secrets

WarcraftMillionaire.com launches comprehensive World of Warcraft Gold Making Package - including complete 1-70 gold making guides, auction house and grinding guides and tools to reach the top of gold making possibilities in World of Warcraft.

San Dimas, CA ([PRWeb](#)) May 9, 2008 -- WarcraftMillionaire.com has just launched it's first product, Warcraft Millionaire: The Blueprint to One Million Gold, a complete gold making solution for the world's most popular MMORPG. World of Warcraft players across the globe have provided substantial feedback in recent months and WarcraftMillionaire.com owner, Brad Johnson has listened, dedicating himself to providing the world's most complete [WoW gold guide](#), designed to integrate the top gold making techniques from multiple strategies into a thorough package of tips, strategies, and resources.

First formulated in the wake of Brad's monumental achievement of becoming World of Warcraft's first millionaire, Warcraft Millionaire was designed to provide a comprehensive outlook on how the game's economy operates. Starting with a general overview of in-game economics and real world principles, the guide delves into the various strategies for making gold, grinding locations in Azeroth and Outland, gold making methods for every level, and the most recent updates to the game.

"Friends and fellow players have provided substantial feedback on gold making in the game, and we have strived to create and offer something more than a simple list of gold making strategies. Rather, the goal of WarcraftMillionaire.com has always been to develop a complete in-game view of the economy and its inner workings, so that a player can both understand and take advantage of every possible gold making method available," says Brad.

The [Warcraft Millionaire](#) package was crafted to include a complete outlook of gold making processes in the game. Included in the package is a thorough beginner's guide with a basic introduction to the in-game economy; the foundations required to make gold, and the mindset that is needed to be successful.

A 1-60 Azeroth Gold Guide as well as a 60-70 Outland Gold Guide is added to provide the best gold making locations, items, and mobs, both updated to reflect the latest patch prices and gold making rates. An Auction House Guide outlines the specific methods used in the Auction House to monopolize and take control of market conditions and maximize profits, while a Daily Quest guide shows players with Level 70 characters how to take advantage of their high level to visit obscure locations and make gold on a daily basis. A Grinding Guide and list of Limited Items Report provide an additional reference for players seeking a means by which to locate certain items, mobs, and vendors throughout the game.

The Warcraft Millionaire package, when combined into a single product, presents a full overview of gold making possibilities in the game, to include the very same methods that helped Brad reach his millionaire status. In conjunction, the guide is a unique and ground breaking look at the economy within the biggest MMORPG of all time.
